

NARCAN TRAINING

Presented by:

Opioids, like heroin and prescription drugs, can cause a person to stop breathing. Narcan (also known as Naloxone) temporarily reverses an opioid overdose allowing time to access medical attention. Narcan is easily administered as a nasal spray and is completely harmless if administered in error.

Date & Time: Wednesday, May 29th 7:00-8:00 PM

Location: Monroe, CT Senior Center at 235 Cutlers Farm Road

RSVP to ensure a kit: m.fitzgibbons@snet.net (subject: Narcan) by May 27th,
Marcia Fitzgibbons

Sponsors: CERT, ADAM, CARES. (Community Emergency Response Team; Alcohol and Drug Awareness of Monroe; Community Addiction & Recovery Education & Support Group)

FREE Training Will Review:

The Current Opioid Crisis
How to Prevent an Overdose
Signs and Symptoms of an Overdose
How to Administer Naloxone (Narcan)
Current Protective Legislation
